Objective

I am in love with helping people. I team up with local developers to craft software that provides value, and want to accelerate my learning alongside a group of caring, passion-driven individuals. I work incredibly hard to deliver hand-crafted results, and am dedicated to life-long learning. I aim to advance into a senior developer role one day, and want to help others rise with me.

Education

Computer Programmer/Analyst Associates of Business

Lansing Community College | Aug. 2028 (Expected)

Computer Technology and Networking General Associates

Lansing Community College | Aug. 2028 (Expected)
